Professional Summary

Software Engineer with 3 years of experience building production mobile and backend systems using Flutter, .NET, Laravel, SQL, Firebase, and AWS. Delivered enterprise applications collectively serving 12,000+ users, with hands-on experience in application architecture, REST API development, database optimization, cloud automation, and production reliability. Recognized as a top 10% performer at ICICI Lombard for FY 2024–25.

Skills

- Languages:** PHP, JavaScript, Dart, Python, C#, SQL, Go
- Frontend:** Flutter, React.js, Angular, Riverpod, HTML5, CSS3
- Backend:** Laravel, .NET 8, REST APIs, gRPC
- Databases:** PostgreSQL, MySQL, Redis, Firestore, Firebase Realtime Database, Hive
- Cloud & DevOps:** AWS (EC2, ECS, EKS, Lambda, S3, Step Functions, CloudWatch), Docker, Jenkins, Kubernetes, CI/CD
- Methodologies:** Agile, SCRUM
- AI & LLMs:** Google Gemini API, Prompt Engineering, LLM Integration
- Architecture:** Clean Architecture, Repository Pattern, MVC, Dependency Injection
- Monitoring & Analytics:** Grafana, Dynatrace, Firebase Analytics
- Tools:** Git, Postman, GitHub Copilot, Figma

Experience

ICICI Lombard GIC. LTD. Associate Software Engineer,	Mumbai, Maharashtra, India / Bengaluru, Karnataka, India July 2023 – Present
--	---

- Built Workforce Mobility Suite:** Delivered geo-fenced attendance and real-time employee tracking using GPS. Added leave management and engagement notifications. Built with Google Maps, Firebase, and CleverTap. Used daily by 5,000+ employees.
- Led State Management Modernization:** Migrated the Flutter codebase from Provider to Riverpod across 30+ screens, using Clean Architecture and dependency injection. Cut widget rebuilds by 30% and new feature build time from 2 weeks to 1 week.
- Built Real-Time Chat Feature & Analytics:** Delivered a full-stack chat feature end-to-end — database, backend, and UI. Used Flutter for the client, Firebase for real-time messaging, and a custom .NET 8 API for token-based authentication. Integrated Firebase Analytics to track usage and generate business reports.
- Built AI-Powered Reputation Monitoring Platform (ILConnect):** Built a platform to monitor the company's online reputation across LinkedIn, X, and other platforms. Used Google's Gemini API for sentiment and priority analysis. Auto-generates tickets through an admin-configurable workflow, with role-based access and AD login.
- Optimized Critical Database Workloads:** Rewrote 30+ slow MySQL and PostgreSQL queries using execution-plan analysis and indexing. Cut analytics load time from ~5 minutes to under 2 minutes. Reduced monthly report generation time by ~50%.
- Modernized Enterprise Backend Services:** Migrated ~30+ legacy PHP modules to a Laravel REST API architecture. Improved API response time by 30% and eliminated a recurring class of production failures.
- Built Serverless Automation on AWS:** Built 3 AWS Lambda functions in .NET 8 for analytics, alerting, and scheduled processing. Eliminated 2 hours of manual work daily, delivered within 3 weeks of adopting the AWS ecosystem.
- Owned Production Reliability:** Maintained 99% uptime using Grafana and Dynatrace dashboards and incident runbooks. Resolved 10+ critical incidents and cut average resolution time from 3 hours to 1 hour.
- Managed Release Cycles:** Managed 10+ production releases with QA and product teams. Introduced release checklists and rollback protocols. Reduced post-deployment incidents from 3 to 1 per quarter.

Education

- | | |
|---|---|
| PVPP College of Engineering (Affiliated to University of Mumbai)
Bachelor of Computer Engineering, GPA: 8.65 / 10 | Mumbai, Maharashtra, India
Dec 2020 – Jun 2023 |
| Vidyalankar Polytechnic (Affiliated to Maharashtra State Board of Technical Education)
Diploma in Computer Engineering, Percentage: 90.63% | Mumbai, Maharashtra, India
Aug 2017 – Nov 2020 |

Projects

- URL Shortener | React JS, Golang, MySQL, Redis | Personal Project** Currently working
Building a link management service with custom slug generation, click analytics, and expiry controls. Backend in Go with MySQL persistence; React.js dashboard with Redis caching. Targeting sub-50ms redirect response time.
- JIRA Clone | Angular, Golang, PostgreSQL, Redis, Web Sockets | Personal Project** Currently working
Building a project management platform with a Go REST API and Angular frontend. Uses PostgreSQL and Redis for data and session management, with JWT authentication, sprint planning, and a drag-and-drop kanban board.
- WoMenstrual – A Fertility, Ovulation and Period Tracking Application | Flutter, Firebase** Aug 2022
Cross-platform fertility, ovulation, and period-tracking app for Android and iOS. Built with Flutter and Firebase, with authentication and cycle prediction.

Achievement

- Awarded High Flyer Certification (top 10% of engineers company-wide) at ICICI Lombard GIC Ltd. for exceptional performance in FY 2024–25.
